B C B NEWS

Received a release of the FCC from Jack Gardner, it reports that all BCB licenses will be for a 3 year period effective December 15 1943. All licenses will not fall due on same date but will be staggered through the year, and renewals will range from one year to two years nine months and then all licenses will be for the full 3 years.

In the last issue I told that the Kalmbach's had a new DXer in their family, one of the members wrote in asking the sex. Well I always thought a DXer was a male person but guess that females can be DXers also. Any way John (Wimpy) Kalmbach says that only a person from the Indian Country would ask a question like that. Anyway its a boy and his name is David.

YANKS IN THE RANKS

PVT LEN KRUSE

Camp Kohler, Calif

I have been working on arranging some of those badly needed west-coasters by many of our members. The past week have arranged four namely KFXM-KGY-KLBM-KRJJ. So hope if possible that

most of you send in reports to all these stations. My most recent veries in are CBK-KDKA-KVOO-KMTR with several pictures of their fine station. Station KID which was reported deleted in Broadcasting but 4 hours per day. KIT tested on Jan 11th. (Swell work on CPC and good luck-Ray)

PVT NORMAN KERNODLE
T D A A F C T T C
LAW COMMONS ROOM 205
UNIVERSITY OF IOWA
IOWA CITY, IOWA

Since starting DXing Nov 19th I have logged and reported 255 stations. Total veries now are 140 with plenty of reports out. Among my better veries are KFWB-WHBU-WSUN-WLBC-WSBT-WBRC-WKMO-CHML-WEAU-KTRI-WATW-KGNO-WBIR-WCSC-WHBY-WGL-KPO-KGKL-WISE-KHBG-WBTH-WSAY. I have knocked off quite a

few freq checks lately DXing with Frank. Really surprising how these 250-watt peanut whistles roll in. Frank has really shown me a lot about DXing so I'm really getting a good start in the game. Wonder if ~~WXXX~~ KGNO will count for double milage on DX as they did not mention NRC (Yes They will Norm as it was listed as NRC-Ray) We heard the bang up WJBO DX show and really thought it was tops. The way we're logging em we sure need them report forms. (OK Norm should be very soon now-Dick said week-end)

PVT FRANK SUSORENY
Same QRA as above
only ROOM 203.

Have added quite a few veries to my log since last report. They are letters from WLAY-WSLS-WLAG-WATW-WRUF-WBAX-KIUL-WBOW-WHBY-KTTS-WGRC-WSAY-WKBZ-KGCX-and cards from WBIR-CFJC a beauty-KVRS-XELO-WMAQ-

WKBB-CFBR-KGNO-KHMO-KGKL-KMO. Both card and letter from KFXJ who send picture of their xmtr on the card. Now have 592 veries with quite a few out, so expect to go over 600 by the end of this week. Hrd on DXes were CFBR-WSNY-WJBO recently. CFBR held its own against WNOE way out here in the Corn State. Rather surprised to not see anyone mention KGCX testing on 1/8 as they came in like a ton of bricks here. Anyone hear a Cuban on 1460 kc this AM 1/19, was it CMCG? (Dick said Fprms over this Week-end)

DXed from Elizabeth NJ until July 1940 at which time I enlisted in Army. Stationed as above., and live 2 mile from Post (West Point) with wife and daughter. Rotten location for DX compared to Jersey, but better than nothing. Do not care for SW and only listen occasionally for the novelty of it. Have about 25 SW veries. BCB 921 logged and 845 verified. Use 9tube Zenith-75 ft E-W antenna.

Please change my listing of AFHQ from 2965kc to 8965 kcs. I cant seem to pick up Dakar on 15370 kcs afternoons as I used to. Think they have gone off completely. About cheap veries. Sometime ago someone spoke of em. Recently I got an answer to a report from PRL-8 hio a 50KW station, all they sent was a periodical containing some material on their programs & station. Not even a letter, let alone a verie. On other hand from HCJB Quito a 1kw sta I received a nice letter via AIR MAIL. On about 9370 kc a station PJA calls NY tnk its either Surinam or Curacas. After communication is established they go to garbled speech. Have any of you SW DXers picked up South Africa or Iceland lately??? To TED BAMBERGER-I have a Sky Buddy and find BCB DXing with a vertical pole is lousy. Get better results with almost any type horizontal. Pole antenna is best for SW. I have a 15 ft pole aerial and a triangular horizontal aerial.

JACK GARDNER-Please advice member Kary as to 7060 kc I gave for CMZI, isnt right, its my error or the fact that logging on my 8 year Midwest is better than on my Sky Rider, as to logging SW but the Sky Rider is more accurate in calibration. Glad to know somebody is checking -reading the SW column, sorry Paul to make you waste time.

AUGUST BALBI-LOS ANGELES, CALIF Pleased to note the increased reports on Short Wave reception in last bulletin, trust the boys will keep it up. Reception rather poor in general, since the 1st European reception has shown some improvement, but still far from good, our best reception strange as it may seem is the General Overseas Service from London and not the N.A. service, in fact GRW on 6150 kc beamed for the Near East after 10PM is our best hrd London transmitter at times like local, too bad they use this particular xmitter for N.A. from 10;15-11:30PM as CKRO in Winnipeg causes strong interference.

PAUL KARY-JOHNSTOWN PA SW DXing is improving somewhat around here in the evenings but not enough to suit me. I imagine most of the BCB DXers could murder me for the next statement-I will be glad when spring and summer come. Most everyone knows that the seasons have the opposite effect on SW and BCB. Have sent out 48 SW reports since July 1943 and up to date have 7 veries and one answer. Havent bothered as yet with US SW stations. Recent verie was from CJCX, Sydney, Nova Scotia. SW veries come in like molasses in January, compared to BCB veries but what more can one expect. Tnx to Gordon Stearns for your welcome, I owe a lot to you. To DAVE THOMAS Tnx for info on Beirut. Will have a try at it anyhow. Maybe someone can answer me on this// Do you think its wise to enclose return postage with SW reports as with BCB reports? US stamps can not be used outside of US anyhow. However I've been doing this as the SW stations feel more obligated to verify if you enclose a stamped envelope even though they dont use it. Its gotten me into a lot of trouble with the censors and I've had to get a Philatelic Permit.

BUD KOPP-ROCKFORD ILL I have noticed from time to time that the SW reporters have trouble with images and cant tell between the images and the actual signal Here is a tip. The BFO on your receiver is set to beat on one side or the other of the signal, mine is on the high side, if you tune a signal without BFO get it at zero beat, then turn BFO on and AVC off, adjust the RF so no blocking occurs, if you have to tune the dial to a Kilo higher than the signal, so the BFO beats, you are on the actual freq, if you have to tune a Kilo lower, you are hearing the image. As to getting rid of images I've read that antenna tuners will do a little but I dont have any success with them. I think a better way is in your antenna. A doublet half wave for 20 meters should be good, it will operate good in only the 20 meter band, but this is usually the only freq troubled by images. (For SW-BCB DXers) Images will also be on all higher freq. A separate Marconi Zepp also reduces high freq images. I am now waiting for a letter from the Navy to see whether I passed the Navy Radar test. I'm fairly sure I passed. If so I'll be going soon. Have been doing a bit of code practice, some good stations are WSL-5555kc at about 8PM, abt 20WPM; WRUX-7805kc near 8:30-8:50PM; KCI-nr 8000 kc at 11:30AM-11:45AM and another I havent identified near 7760 kc from before 4:25PM till after 5:35 PM about 15 to 18 WPM. All the above is PX. (Good luck Bud from us all)

Just received a card from Dick Cooper-NRC-DX XEDF-790 kc. Did you REPORT. Was on Feb 20 1944 from 3-4:30 AM EWT. If you did not report send Tnx Card.

Remember report all the Special DXes you can. At least send TNX CARD.

PAUL KARY First I'd like to correct the call of Georgetown listed as LFY. Should be ZLFY or any rate begin with a Z. You were right Gordon. Any of you SW DXers hear the bootleg station here in US that used to be on during the summer? Call was DeBant-the Voice of All Free America, on about 10390 kcs. Came on at 8:30PM on TUES-THURS-SAT-SUN for 15 min with up to the minute propaganda. Went off in Aug, said to tune them in Sept but never hrd them since. Guess FCC got em. COHI should be listed 6450 kc not 4500kc TO GARDNER-Thats OK Jack, thought I was only one having trouble with dial on Hallicrafters. It took me over 6 mos to completely recalibrate my Sky Buddy for average accuracy. Dont think they are all they are rated.

9905	...	Radio Dakar hrd 2/27 on a new freq from 2:45-5:01PM (Harris)

ROBERT KOSTKA- Short Waves DX getting a little better. Could anyone of you SW DXers help me identify this station??? At about 5:20 I hrd a program of Classical music. The program continued until 5:55PM. There were no announcements. At 5:55 PM they played "La Marsellies" then left the air. The freq was about 8250 kcs. Might this be Dakar???? TO PAUL KARY-- Concerning return postage for foreign stations, you might try sending an International Reply Coupon. They can be obtained at any post office for 9¢ and are good for first class postage anywhere in the Postal Union. Up to now the censor hasnt returned any reports because of them. How long did your PBL-8 verie take?? I've one out for 10 months.

PAML KARY-Regardless of the fact I am a SW DXer and DX news is more BCB I still enjoy it the most of all Radio Publications. (Tnx Paul) I see in the new "DX ALMANIC" there is a German station on 15220 that Xmits "The National Congress" This must have been my station of Delhi of sometime ago. This cuts my most distant DX down to Australia, Japan and New Caledonia. This is going to proove highly embarassing for me as I sent a report to Delhi on this since no mention of Germany of German was ever used or said-Hi. SPH-New Caledonia and Honolulu previously listed as on 15490 were presumably in point to point contact with KEM-Bolinas, Calif. (Well Paul you have no worry about losing milage on that Delhi station. According to the (Great Circle Map) Delhi is 7425 miles; Tokyo-6700 mi; New Calinodia-8600 mi; Melbourne-10150 mi and if you want the greatest distance from Reading get Perth, Aust as it is 11600 miles, the furthest. All these milages are measured as from ~~KennixxxRxx~~ Philadelphia, Penn-Ray)

CHARLES SUTTON-TOLEDO O- Had to give up DXingvfor a while, too many hours and 7 days a week on defense work. As a suggestion wonder why the DXers do not give the make of their receiver, would be interesting to know what type DX was hrd on. I have worked 52 straight days. (OK Chas hope you'll be back listening very soon.-Ray)

/and model number.

Well boys that is a suggestion, just list the make and number of tubes

PAUL KARY Certainly a decided improvement in SW reception from 2/24-3/1. Have really piled up some good ones although not as many SW reports out this week as others. Latest reports to Paramaribo-KKH(Kahuku)-COCQ-WQO-VLW-6CHNX. Total number rpts out since July 1943 stands at 72 with small total of 10 veries and one answer (PRL-1) Saw article in a D c 42 issue of American Magazine on Brazzaville before the new 50KW xmtr was installed and sent it to them just for the fun of it. I would like to hear from any of you SW DXers if you have time. QRA here is 153 Suppes Ave-Johnstown Pa) About WJAC Paul its pretty late in the season so maybe next winter-Ray)

JOE BRAUNER FOR PAUL KARY-Coco-head is an RCA receiving station, in Hawaii or California. This one dates back to the early days of overseas commercial radio, but have forgotten for certain which is correct location.

Remember only 2 more weekly issues after this one. Summer sked in April.

PAUL KARY-JOHNSTWON PA DXing on both BCB-SW has been pretty lousy lately and hardly any sign of spring here contrary to opinion of Newt McLeod-Hi. Been having a great deal of trouble with some type of interference which is not in the power line. Sounds like a car motor at first, goes faster & builds up to the buzzing of a bee until finally it is the high pitched buzzing of a humming bird. Seems to come mainly during snow and rain storms. Anyone know the cause??? TO KOSTKA-Tnx for info on International Reply Coupon. My answer from PRL-8 came back in about 5 months. Dont consider it a verie as it just a copy of their monthly pamphlet of 8 pages. If you have time would like to QSO with you. (QRA Paul is 8909 Southview Ave., Brookfield, Ill) To HARRIS-Believe your unknown on 9890 is CR7BE on 9860; However am not sure; Hrd same with man and woman 2/26 from 3:45-4:45PM s/off. Could never seem to make out ident. Sounded like Lourenco Marques and language Portugese. Hrd English news from 3:50-3:55PM and US Personal Album program next 15 minutes. I use a Hallicrafters Sky-Buddy S-19-R

PFC S Henry Frankel Co "F" ASTU 3900 Oregon State College Corvallis, Ore Sorry that I couldnt arrange KOAC DX, dont believe a DX possible till after the War when help is more available. Stayed up 3/4 for CFJC DX but guess their antenna array has a node in this direction. I did not get a thing but the KLX alnite show and I tried to listen behind KLX but didnt hear a thing. I am pretty much on a straight line between Kamloops and Oakland so that might account for it. Ive been studying antenna arrays and how they radiate directionally and I suppose CFJC has an antenna aimed away from Oakland. Counting the days here as I expect to leave near April 1st. Hope to get a short delay so I can visit home for awhile before going to my next station. Going to try to carry my radio with me but it may not be able to stand the shock, its an old 4 tube miget that I have to solder condensers on every day after someone shakes her up. Got 1st Canadian verie from CBK. Apts to CFCH-KIRO-WBT. WBT out for quite a while now.

AUGUST BALBI-LOSANGELES 6 CALIF Reception out here fair from Orient, very poor from Eurpoe evenings, fair in the morning from London only, darn little new stuff to report. Notice some reports lacking in detail, sample; DXP 6030 kcs comes in good (Kary) BUT WHEN? No SKED given in many reports, personally I know most of them but how about new listeners, you might insert notice to your SW reporters to give if at all possible full SKED, never mind the kind of program, that phase is of little help, but English news period should be given if any, also if hrd regular or only once hrd. Point to Point transmissions are not to be published as being against FCC regulation, it being announced as each such transmission. German station on 6140 is DXX Berlin, hrd 8PM-1AM full SKED 5:55PM-1AM. The SW section certainly improving FB, trust the boys keep it up, we are sort of in the Backwoods out here as far as Eurpoe, Middle Near East is concerned. (THX August for the information and also your suggestions on reports. It is hoped that the boys will continue and report the info as you suggested)

PAUL KARY-JOHNSTOWN PA About XGOY on 7520 kcs, might be possible it was relayed by KKH, Kahuku, Hawaii. However I dont see any need for this as XGOY can be heard fairly easy on the west coast without any relaying. The announcer said XGOY was xmitting on 6400 kcs, a new freq. Any of you fellows know whether one can send a letter to Finland. US isnt at war with Finland you know. TNX. JOE BRAUNER for your info on "Coco Head" Rather imagine it is in Hawaii as have hrd Bolinas, Calif calling them.

GIL HARRIS-NORTH ADAMS MASS No SW news here. Strange light is seen in the Heavens here. An unusual light in the skies here Saturday night, March 18 at 11PM. The light was a solid band of White Rays extending from East to West across the skies like the reflection of a huge flashlight. Local authorities on Northern Lights reported that the light was not like that which usually accompanies them. No detailed explanation of the light was obtainable. It was merely said to be a phenomenon. The back ground noise here over week end too high to keep receiver on very long.

NOTICE

NOTICE

NOTICE

The following is an item from one of the outstanding SHORT WAVE DXers of this country and he writes as follows,

"It appears to me that a number of short wave reporters are doing too much "Assuming" of the identity of stations, looking in an old station list to see what is listed on or near a frequency, with the result that stations not on the air at present are being reported. More careful listening for station announcements would seem to be the remedy. I have in mind particularly the following; HILS-6420 kcs off since last year-- probably heard HILR on 6430 kcs; in San Cristobal;; XEGR-7380 kcs off for 5 years or more; LRA4 on 12290 kcs--doubt if on, probably heard Punta Arenas, Chili on 12270 kcs;; CP2 on 6110 kcs--not heard here, doubt if on; ZNB on 5890 kcs, this is ZRK on 5885 kcs, Capetown;; "roll on 7220 kcs--off since last year-- heard DXR2 in Berlin; VLQ4 on 7220 kcs in Sydney--this is VLQ2 on 7215 kcs in Brisbane."

Now the above is not a slam to anyone, it is just a little dope on what is being reported. In reporting like this, some DXers may be losing a chance to log a new station or even a new country besides reporting the wrong information that would lead others astray. It is regrettable that no up to date Short Wave logs are available but that is just one of the things that the war is making us do without, so by heeding the advice given above I, your Editor, believe that you will be helping yourselves just as much as others by being a little more careful and exact.

RONALD BURSON. Have been hearing Algiers on the 8mc band Q5 R8 and on the 9mc band Belgium National Radio, Belgian Congo Q5 ⁴⁹ with news at 8:30PM. Also Australia on 7mc band Q5 R8 with news at 8:15AM.

ERIC BRISTOW-CHICAGO ILL Last time I wrote I was not too well but i am now getting along OK. I work in the Post office for past 20 years. Hobbies are DXing and photos, cant take many now account of the war.. Heard a station W-BI, (May be WABI Eric) Tried for N Hamp and Maine to try to get something so I can have one station in each. I now have 425 US and 30 other stations. Just got KALE. Only a few reports out and hope some of them come in. Going to listen a little this summer.

MORE SW NEWS

PAUL KARY-JOHNSTOWN PA NOTICE NOTICE; In a recent letter received from "Radio Guadeloupe", Mr G Godeber, director has stated that he would greatly appreciate any reception reports. The station has been suffering from the past several years from humidity and the lack of parts, and at present they are doing their best with the makeshift equipment available. Therefore all reports are of invaluable aid. It may even mean a DX next season for the 3 clubs. and if not possible they will doubtless do so on their reg skeds. They xmit on 7455 and 650 kcs, so the field is open for those strictly BCB DXers. Skeds are from 12:30-1:45PM and from 7-8:30PM EWT. Lets show some of that DX spirit. Veries recently received from Radio Guadeloupe-VLW6 Perth-CUM and CUY-WCU San Juan-HP5A and a number of US veries.

RODGER LANE-GREENFIELD MASS Well I lost the DX bug about 6 months ago & just got it back so been trying to catch up. Reception good here now or it may just seem good. Using a Hallicrafters S-20-R with a 25 meter doublet. Germany has been good lately with news every hour, also there are an increased number of English stations on. The new American broadcast sta in Europe is good on the 31 meter band and Advanced Press HD being relayed by AFHQ on 8960 kcs. TGWA & TGWB on 6480 & 9685 kcs with Marimba music at 12 MDT coming in very good. Also PRL8 on 11720 kcs with English program at 10PM every night.

NOTICE

This is the LAST ISSUE OF N R C SHORT WAVE NEWS. It was suggested to the Board of Directors that the National Radio Club become strictly a Broadcast Band Club. They approved by a vote of 8 to 1. So effective September 15 1944 the short wave section will be dropped and the N R C will continue ONLY as a BCB CLUB.

The reasons for this move is that our SW section is and has been one of the poorest ones in existence. There have been only 2 reliable reporters in the past 10 months, those being Gil Harris and Paul Kary with August Balbi submitting reports every once in a while. This issue you will find 3 reporters.

Then I am not familiar with SW calls or their frequencies, to determine if they are correct is beyond my judgement so everything is listed just as received. I also am not in a position to judge what SW info will be valuable to a member and what will not. Then the time to gather the info and line it up according to freq in their proper order is not being available. A SW DXer to compile and get this section is also NOT AVAILABLE as it has been tried, then it had to be given up account of the DXers work making it impossible to continue as SW editor. Then upon examining the reports from the other clubs bulletins it is found that most of our SW members belong to them and we believe that our SW members can get just as much SW info from them without the NRC SW section.

So upon receipt of this bulletin, those SW members who do not wish to receive the remainder of their bulletins, will receive a refund at the rate of .06¢ per issue if they will please drop a card to Club HQ. However if no word is received you will receive the remainder of your bulletins and a card asking you to renew when your membership expires. To those SW members who will not renew their membership, it will be very greatly appreciated if they will drop a card to Club HQ stating so as it will be a great help to your Editor.

Lastly to those who are SW DXers but DX at times on the BCB we ask you to remain with the club as we will devote the entire bulletin to the BCB end of DXing and promise you that the information it will contain will be of the latest and best that is possible to have.

In closing I want to thank every SW member for his continuous support to the club and hoping that he will understand the reason for our change.

To those NOT belonging to any other Club and wish to continue SW, it is suggested that you get in touch with any of the following Clubs and ask for a sample bulletin.

Universal Radio DX Club	7507 Holly St.,	Oakland 3, Calif.
Victory Radio Club	1006 Lagonier St.,	Latrobe, Penn
Newark News Radio Club	215 Market St.,	Newark 2, N.J.
Program Information Unit-Foreign Broadcast Intelligence Service		
Room 608 1424 "K" St., N.W. Wash 25 DC.		

For this last one a report has to be submitted, in order to receive a copy.

To the Gang I would like to ask the Gang to look around for a fifteen foot vertical antenna. It is impossible to buy an antenna of this type in New York. Thanks a lot. QRA is Edward Prendergast-P.O. Box 285 Albertson, N.Y.

Just a little more info in regard to dropping the Short Wave Section. I wasn't exactly satisfied to drop this section without contacting a Short Wave DXer who would know what he was talking about, the following is part of his answer which in my judgement covers the entire problem. QUOTE " So until such time as there are more active short wave listeners, and until the NRC can obtain an experienced shortwave DXer as SW Editor, it looks as the best policy is to give up the shortwave section.

There is one other possibility, and that is to continue a small short wave section, and ask the few listeners who do report to send only items of major importance, principally new stations. Also to be certain of the identity of all stations reported, through actually having heard station announcements, not just assuming the identity, particularly as regards to Latin American stations" End of Quote.

As to the above statement from a SW DXer and in regards to his last paragraph, I would be willing to continue that section if we could obtain as an Editor a good SW DXer who would know and abide with the above. So with no one available and I am not in a position to know which is important and that which isn't, I believe that it is best to drop the SW section at least for the time being. I am sure that no one will believe that we are tossing you over, but feel that the SW section just isn't worth while at this time. Our membership consists of about 85% of them being BCB DXers and it is believed that they being in the majority and reporting regularly, they should get the best BCB news obtainable.

Thanks again and lots of good luck; and please do as is asked on St Page 1. It will help to keep us all straight easier.
